

Release Notes January-February 2016

3.148.3809.0

3.148.3809.0

Successfully integrates Great Plains 2015

The Inventory Items Master List added Location Code, Location Name, and Site to the Quick Find column dropdown options.

Sales Board optimizations added

Ability to refresh prices on Sales Orders when using Price Schedules is now possible when changing Deliver by Date instead of Ship on Date.

Added ability to select a new "Override Price" checkbox column in Sales Orders. Prices for that Product Line will not be refreshed from the price schedule when the checkbox is active.

Restored ability to mark a Purchase Order as Received when it contains only Addon lines (no product is listed).
