Pallet Configuration Quantity Added to Import

- **Hybrid Tag Changes:** Master Containers can now be added to hybrid tags enhancing your traceability.
- **Pallet Configuration:** Product Import now allows Pallet Configuration Quantities to be uploaded with a new product, or you can upload product with the PalletConfigQty field to overwrite and edit existing products .
- **Grower Accounting Updates:** Columns to the pivot grid more clearly display the financial information. The grower accounting totals master list has also had its column updated to match where appropriate.

The new columns are:

- Sell Amount: The amount of the product *before* customer rebates / discounts are applied
- Billed Amount: the Settled Billable Amount from the Invoice data.'
- Invoice Remaining: Billed Amount *minus* Payments
- Supplier Commitment: Billable Amt *minus* Charges that have been checked "Grower Accounting"
- "Supplier Paid" = Payment Amount from the Payments Tab.
- "Supplier Due" = "Supplier Commitment" *minus* "Supplier Paid".

Release **3.134.3298.0** is ready for distribution. To receive this update, contact support@unisunsoftware.com to schedule a time.
