Release Notes

September 2014 - 3.124.2588.0

EnvioAg

Enhancements

Company

#2580   When Read-Only mode is enabled, you will no longer be prompted to save changes when exiting a screen

Production

#2574   Added the Save button to the default workline grid. For First time users of the Run Workline area, the Save button automatically shows and no longer must be brought onto the grid

#2574   Added a Cancel New Item button. This allows an operator to cancel out of a New Item without voiding the new item

#2574   Navigation is now disabled without validation on new or changed Items inside any run screen; no line items may remain incomplete

Sales

#2579   Adjusted Sales Order pricing behavior when Price Schedules and Base Prices are both activated

Supplier Receipt

#2574   Navigation is now disabled without validation on new or changed product lines in Supplier Receipt; no line items may remain incomplete

Dock Operations

#2588   Added BillTo AcctCode to columns in the Load dropdown selector

Touch Label

#2582   MultiCompany functionality – different TouchLabel workstations can now access different companies and offers the option of using different EnvioAg Users

#2582   PackoutLane filter – this enhancement allows PackoutLane to be used as a filter to control the list of products showing on the TouchLabel screen

Release Notes

September 2014 - 3.124.2588.0

Repair Notes

#2577   Master Lists now refresh appropriately

#2580   The controls in the run screens tabs are disabled when
            the run is closed.

The TouchLabel module now supports multi-company and multi-user
